AC 1050

Servomotor Controlled Double Head Aluminium Cutting Machine

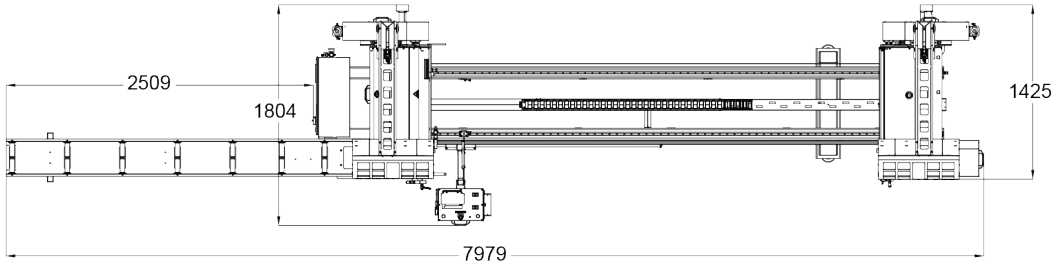

General Features

- Precise cutting of Aluminium profiles between 20°-135°.
- Has lubrication system.
- Left feeding table and automatic saw safety cover.
- Profile support arm between two heads.
- Special vacuum system to cut without depositing sawdust on heads.
- Profile height measuring system.
- Automatic slicing system.

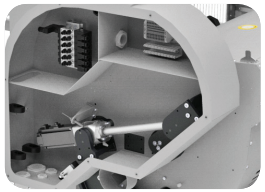

- The machine has patented features.

- On auto mode, it goes to position without operator intervention.
- Option to work with CF Card.
- 1850 different cutting length memory capacity.

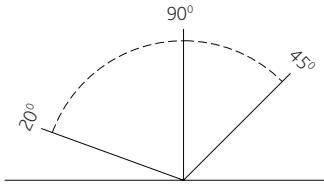

- Precise cutting at inner 45⁰, outer 20⁰ thanks to patented control system.

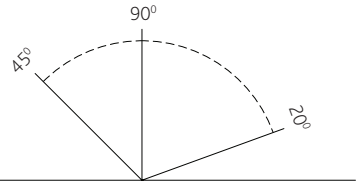

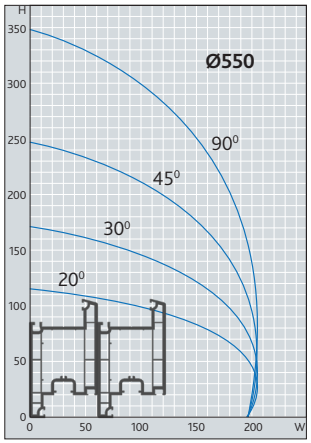

- Hydropneumatical system provides precise cutting quality.
- Horizontal profile clamping and practical piston place adjustment system.
